PROFESSIONAL SUMMARY

Recent Diploma in Information Technology graduate with hands-on technical support experience and a foundation in software and web development. Experienced in supporting election-related computer systems, troubleshooting technical issues, and assisting with administrative data processing. Familiar with Java, Spring Boot, SQL databases, HTML, CSS, JavaScript, and React. Seeking an entry-level opportunity in IT support, application support, IT operations, or junior software development.

TECHNICAL SKILLS

IT Support and Troubleshooting: Computer hardware and software troubleshooting; basic computer maintenance and laptop cleaning; Software installation and configuration; Windows operating system support; Basic networking and peripheral troubleshooting; application support and technical problem-solving

Programming and Web Development: Java and Object-Oriented Programming (OOP); Spring Boot and REST API fundamentals; C#, JavaScript, HTML5, CSS3, Bootstrap; React fundamentals and Axios; PHP, Node.js, and Express fundamentals

Databases and Development Tools: MySQL, SQL, SQLite; MongoDB / NoSQL fundamentals; Spring Data JPA and Hibernate fundamentals; Git and GitHub, Maven, JUnit fundamentals, Visual Studio Code, XAMPP

Additional Skills: Data entry, record management, documentation, and administrative support; Problem-solving, attention to detail, teamwork, and willingness to learn

WORK EXPERIENCE

CCS IT Technical Support Staff – Election (MERU)

Commission on Elections (COMELEC), Philippines | May 2025

- Assisted with technical support and system operations for the Consolidated Canvassing System (CCS) during local election activities.
- Helped troubleshoot technical issues encountered during election-related computer system operations.
- Supported reliable system use and election-processing activities and coordinated with personnel on technical concerns.

On-the-Job Trainee – Administrative / Records Support

Talibon Water District, Bohol, Philippines | Dates: July 2026

- Assisted with customer ledger maintenance, record editing, and posting of information.
- Helped respond to client inquiries and complaints and supported routine administrative tasks.
- Practiced accuracy, organization, and professional communication when handling records.

PROJECTS

E-Commerce REST API

Java, Spring Boot, Spring Data JPA, MySQL, React, Axios

- Developed product-management REST endpoints for create, read, update, and delete operations.
- Implemented database integration, request validation, and exception-handling concepts.
- Practiced layered architecture using controllers, services, and repositories and connected frontend components to backend API endpoints.

School Information Board

Web Development

- Developed a school-related information system project and practiced organizing information in a web application.

Food System

Web Development, Database Fundamentals

- Built a food-related system project as part of software development practice, applying programming and database concepts.

School Management Transparency

Web Development, Database Fundamentals

- Worked on a school management and transparency project intended to improve access to organized information.

EDUCATION

Diploma in Information Technology (DIT)

North Coast Bohol Institute Inc. (NCBI) | Graduation year: 2026

ACADEMIC RECOGNITION

Best in Programming

Academic recognition earned through hard work, programming skill, and dedication.

CERTIFICATIONS / TECHNICAL QUALIFICATIONS

Oracle NC III | Java NC III | Web Development NC III | CSS NC II | 3D Animation NC III

PROFESSIONAL ATTRIBUTES

- Willingness to learn new technologies and procedures
- Analytical thinking, adaptability, and technical problem-solving
- Responsible handling of records and assigned tasks
